Europcar joins TPPL framework for local government contracts

Responding to the growing pressure for flexible and sustainable mobility solutions in the public sector, Europcar Mobility Group UK has joined The Procurement Partnership (TPPL) framework. With its strong focus on low and zero tailpipe emissions cars and vans which are perfectly aligned to public sector sustainability goals, Europcar can provide the flexibility of rental without the requirement for long-term financial commitments.

Providing National fleet Framework Agreements to members with a wide range of cost effective flexible solutions across vehicle purchase, contract hire and daily rental, TPPL is accessed by many public sector organisations. Whatever the acquisition method, TPPL solutions meet the requirements for any vehicle type a public body may require, including electric vehicles, welfare buses, specialist commercial vehicles, heavy goods vehicles and more.

Europcar's extensive fleet of petrol and diesel cars and vans, accessible from across the UK and supported by delivery & collection, give public bodies comprehensive choice for their mobility needs. Plus it has made a significant commitment to simplifying electric and hybrid vehicle rental, with the electrification of the majority of its network as well as growing its electrified fleet, with 14% of cars now fully electric or plug-in hybrid – well above the industry average. The business has also led the market in providing the tools and support to help organisations introduce electric.

Earlier this year, Europcar introduced price parity on electric car and van rental rates for business account customers. Rental rates of electric cars and vans now match their petrol/diesel equivalent, removing price as a hurdle for renting electric. Another industry-leading policy introduced in 2025 means EVs are at least 80% charged at the start of a rental and only require 20% charge on return, helping to overcome customer anxiety about charging an electric vehicle ahead of its return.

“Transport accounts for such a significant proportion of carbon emissions that it is vital everyone in the industry makes meaningful changes as soon as possible,” commented Tom Middleditch, Sustainability spokesperson at Europcar Mobility Group UK.

“At Europcar we are fully committed to helping fleets reduce their environmental impact by enabling them to access a range of low and zero tailpipe emission car and van options. And for the public sector in particular we understand the imperative to reduce emissions as quickly as possible. We are already working with a number of public bodies, providing flexible mobility solutions. We therefore felt the time was right to join TPPL to ensure these organisations can access our services as easily as possible.”

About Europcar Mobility Group

Europcar Mobility Group is a global mobility player, with 75 years of mobility services expertise and a leading position in Europe.

"We help to change the way you move" is what we stand for and brings us together. More than ever, we're committed to delivering simple, seamless, innovative solutions that make mobility easy, enjoyable and increasingly eco-friendly.

To do this, we offer to individuals and businesses a wide range of car and van rental services, be it for a few hours, a few days, a week, a month or more, on-demand or on subscription, relying on a fleet of more than 280.000 vehicles, equipped with the latest engines including an increasing share of electric vehicles.

Our brands address differentiated needs, use cases and expectations: Europcar® - a global leader of car rental and light commercial vehicle rental, Goldcar® - a frontrunner at providing low-cost car rental services in Europe, Fox-Rent-A-Car®, one of the main players in the car rental market in the US, with a "value for money" positioning, and Euromobil®, a German car rental player. The Group also operates the "myEuropcar" platform for vehicle subscription.

Customers' satisfaction is at the heart of the Group's ambition and that of our more than 9,000 employees, everywhere we deliver our mobility solutions, thanks to a strong network in over 130 countries (including 15 wholly owned subsidiaries completed by franchisees and alliance partners).
